Essays and Treatises on Philosophical Subjects Nov 06 2020 This is the first edition in over a century to present David Hume's Enquiry Concerning Human Understanding, Dissertation on the Passions, Enquiry Concerning the Principles of Morals, and Natural History of Religion in the format he intended: collected together in a single volume. Hume has suffered a fate unusual among great philosophers. His principal philosophical work is no longer published in the form in which he intended it to be read. It has been divided into separate parts, only some of which continue to be published. This volume repairs that neglect by presenting the four pieces that Hume in later life desired to "alone be regarded as containing [his] philosophical sentiments and principles" in the format he preferred, as a single volume with an organization that parallels that of his early Treatise of Human Nature. This edition's introduction comments on the historical origins and evolution of the four parts and draws attention to how they mutually inform and support one another. The text is based on the first (1758) edition of Hume's Essays and Treatises on Several Subjects. Notes advise the reader of the changes made in the final (1777) edition. Excerpts from the work of some of Hume's most important contemporary critics are included as appendices. Hume's abundant references to ancient historians, geographers, poets, and philosophers—many of them now quite obscure—are rendered accessible in this volume through extensive textual notes and a bibliography of online sources.

Globalization, Consumption and Popular Culture in East Asia Jul 14 2021 This book aims to provide comprehensive empirical and theoretical studies of expanding fandom communities in East Asia through the commodification of Japanese, Korean and Chinese popular cultures in the digital era. Using a multidisciplinary approach including political economy, East Asian studies, political science, international relations concepts and history, this book focuses on a few research objectives. In terms of methodology, it is an area studies approach based on interpretative work, observation studies, policy and textual analysis. First, it aims to examine the closely intertwined relationship between the three major stakeholders in the iron triangle of production companies, consumers and states (i.e., role of government in policy promotion). Second, it studies the interpenetration, adaptation, innovation and hybridization of exogenous Western culture with traditional popular cultures in (North) East Asia. Third, it studies the influence of popular cultures and how cultural products resonate with a regional audience through collective consumption, contents reflective of normative values, the emotive and cognitive appeal of familiar images and social learning as well as peer effect found in fan communities. It then examines how consumption contributes to soft cultural influence and how governments leverage on its comparative advantages and cultural assets for commercial success and in the process augment national (cultural) influence. These questions will be discussed and analyzed and contextualized through the case studies of J-pop (Japanese popular culture), K-pop (Korean popular culture or Hallyu) and Chinese popular culture (including Mando-pop and Taiwanese popular culture).
